Whispering Knoll's building; lobby, resident rooms, hallways, lounges and grounds are attractive and very well maintained. The administration, registered nurses and staff are professional, courteous and caring and treat visitors and residents with dignity and respect. It's a positive and friendly environment. The activities offered to the residents are varied and well run and the food service is excellent. Its close proximity to JFK Hospital and Rehabilitation Center is an important factor for selecting Whispering Knoll for my mother's respite visits when I travel out of state. I know my mother is well cared for and in competent hands when she stays at Whispering Knoll.
